1/ Appropriations include sequesters, supplementals, rescissions of appropriations, appropriations to liquidate contract authority, and contingent emergency appropriations made available by the President. Not included are permanent appropriations, trust funds, other automatically funded accounts, and rescission of contract authority.

2/ Gramm-Rudman-Hollings sequester reductions are included.

3/ FY 1994 and all prior years include funding for J.F. Kennedy Center for the Performing Arts, which was transferred from NPS responsibility in FY 1995.

4/ The Service is currently undergoing a thorough review to ensure that its visitation counting methodology is being applied in an accurate and consistent manner. Although some parks are now showing a higher visitation number, the net result is a significant reestimation downward of total recorded visits to parks. In order to continue to show correctly the basic trend in park visitation from one year to the next, all prior year totals have been adjusted to compensate for the visitation revisions at individual parks. The refinement of park visitor counts is ongoing, with as many as 20 major changes made each year. For this reason, the visitation total provided in this table will be subject to revision annually. As park numbers are adjusted for the most recent year - upward or downward - prior year numbers for that park are also adjusted, resulting in the constant refinement of the overall total. The counts should stabilize in a few years, after most of the parks with large visitation are reviewed. Please note that recreational visits, rather than recorded visits are displayed in this table.
